Lancaster Farming

VOL. 16 NO. 33 | Lancaster Farming, Saturday, July 10, 1971 | $2.00 Per Year

Among blue ribbon winners in the Lancaster County 4-H demonstration day at the Farm and Home Center and slated to be contestants in the district event in Chester County next week are: left to right, Mary Jane Eshleman, Cindy Hess and Susan Martin.

Farm Families Asked To Host City Youths

The Lancaster County Soil and Water Conservation District is seeking 16 host families for a like number of Lancaster City boys for a two-day city to farm visit July 21-23

Any farm family can assist in the program by agreeing to take a boy by calling Henry Hackman, district executive secretary, at 665-4075, or the district office at 299-5361 Further details will be available at these numbers

The program actually is statewide through the Pennsylvania Association of Soil and Water Conservation District Directors in cooperation with Sears and Roebuck Foundation.

In the local program, the Foundation is providing some funding for a picnic July 23 and an educational tour July 21.

The host families will be responsible for food and transportation from the Farm and Home Center to their home and to the picnic area, the location of which has not been decided yet. The boys will be available to be picked up by the host families by 4 p m July 21 and will be dropped off at the picnic at a time to be designated the evening of July 23.

The boys, of mixed races, are being provided through the Lancaster Boys Club

"This is an opportunity to show urban youths what farm life is like," Hackman said

In order to help get the program established, cooperating farm families should indicate their interest as soon as possible, Hackman urged

Local 4-H'ers Give Demonstrations

Nine Lancaster County 4-H'ers received blue ribbons in the annual 4-H demonstration and public speaking contest at the Farm and Home Center Thursday.

Winning the ribbons in the junior division were: Susan Martin, Ephrata RD3, a discussion of the tools of the trade of sewing; Anita Burkholder, Ephrata RD2, the use of buttons in clothing construction; Regina Lehman, Ephrata, demonstration of parts of a sewing machine; Barbara Huber and Donna Lovett, both Conestoga RD1, team demonstration on proper selection of clothing, and Jane Gregory, Lititz RD1, parts and care of a saddle.

The senior division winners were: Judy Risser, Leola RD1, planning and care of vegetable garden; Debra Gregory, Lititz RD1; how to make an attractive fruit salad in a hollowed pineapple, and Cindy Hess, Strasburg RD1, dairy demonstration on importance of hay in the feed program.

The public speaking entry was Mary Jane Eshleman, Elizabethtown RD1, on "The Value of Leadership." Training in 4-H is valuable for a future citizenship role, she said.

The judges were: Mrs Bonnie

(Continued on Page 5)

York Co. 4-H Livestock Team Wins

York County was first and Lancaster County second among seven teams in the York County 4-H Livestock Judging Contest Thursday at Stonaire Farms, Lewisberry.

The teams and their scores are: York County, 1,215; Lancaster County, 1,174; Dauphin County, 1,166; Adams, 1,155; Chester, 1,132. Cumberland and Lebanon County teams also competed.

Among individual scorers, Gary Buchen, Manheim RD3, placed fourth overall, with a second in sheep and tied for fifth in beef.

Ed Hess, Strasburg RD1, was ninth overall and Joe Lefever, Manheim RD4, was tenth. Also on the Lancaster County team were Jeffrey Greider, Columbia RD2, and Rick Hess, Strasburg RD1.

The Lancaster County team was supervised by Victor Longenecker, Elizabethtown RD3.

The livestock judging team will compete again August 9-10 at the state contest at Penn State University.

Zimmerman and Musser Named State FFA Officers

Two well-known Lancaster County FFA members have been named state FFA officers.

They are: Jay C. Zimmerman, son of Mr. and Mrs. James Zimmerman, Ephrata RD1, and Jacob W. Musser, son of Mr. and Mrs. Jacob H. Musser, East Earl RD1

Zimmerman is the new eastern Pennsylvania regional vice president and Musser is state chaplain. They were among state officers chosen at the annual FFA Activities Week last week at Penn State University.

Previously, Zimmerman was named Lancaster County FFA Star Farmer and Musser received the county Poultryman of the Year Award. Both received their Keystone Farmer Degrees in January. Both have attended the National FFA Convention in Kansas City Both have extensive farming programs

Musser has served as youth director of the Lancaster County Soil and Water Conservation District and was president and reporter of his Grassland Chapter

Zimmerman has been active in local and state contests and his awards include gold medals in meat and dairy judging at the state level

Other new state officers are Doyle Waybright, Gettysburg RD2, president; Roy P Hoppes, Hamburg RD2, vice president; George W Hamilton, North East RD4, western region vice president; William B Homan, Centre Hall RD, north central region vice president; Daniel E Melhorn, 3373 Druck Valley Road, York, south central region vice president.

Esdan B Kaplan, Philadelphia, secretary; William Jackson, New Galilee RD1, treasurer; Duaine Mowrey, Reynoldsville RD1, reporter; James Gelsinger, Robesonia RD1, sentinel.

Jay C. Zimmerman

Jacob W. Musser

Second Slave Auction Planned

The Farm and Home Foundation is seeking volunteers, boys and girls between the ages of 14 and 18, to donate their labor for a day to benefit the Farm and Home Center.

This is the second such event. Several hundred dollars were raised in a similar "slave auction" last year.

The auction this year is slated for July 29 at the Farm and Home Center. A volleyball game will be held from 7 to 8:30 p.m., followed by refreshments. The auction will begin at 8:45 p.m.

The proceeds will be used to help retire debt remaining on construction of the Farm and Home Center.

The auction last year featured boys. But women's lib has caught up and girls interested in babysitting and housework (or whatever) can volunteer this year.

All willing slaves should call Mrs. Joan Erb at 626-5591 or Everett Kreider at 284-4517 by July 19.

Bids will be taken on an hourly basis for an eight-hour day with the work day to be arranged between slave and buyer for sometime in August.

Local Grain

Thursday, July 8

These prices are made up of the average prices quoted by six participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel, except for ear corn which is per ton.

The average local grain prices quoted Thursday, July 8, 1971, are as follows:

	Bid*	Offered*
Ear Corn	44.00	49.00
Shelled Corn	1.69	1.85
Oats (local)	.73	.84
Oats (western)	.98	1.10
Barley	1.06	1.24
Wheat	1.62	1.81

*Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Oklahoma City

Thursday, July 8

Compared to last week, broad-demand for feeder cattle and calves in fairly active trade. Feeder steers steady to 50c higher; feeder heifers fully steady to strong; cows moderately active, steady to 50c higher, bulls strong. Slaughter steers and heifers scarce. Salable receipts for the holiday shortened period totaled 13,300 head compared to 16,200 a week ago and 22,400 the comparable period a year ago. The majority or fully 86 percent of the receipts were feeder cattle and calves, good and choice 400-800 pound offerings, predominating. Cows comprised near 13 percent of the cattle receipts down sharply from the previous week.

Feeder steers: Choice, some prime, 350-500 lb 36.00-42.00, load 440 lb 42.60, 500-650 lb 33.00-37.50, load 515 lb 38.30, 650-750 lb 32.50-33.50, 750-850 lb 31.00-32.70; good and choice 350-500 lb 34.50 37.50, 500-650 lb 32.50-34.50, 30.50-33.00; good 350-500 lb 32.50-35.00, 500-650 lb 30.00- 32.50; standard and low good 600-855 lb 25.00-27.00, lot 940 lb 24.50.

Feeder heifers: Choice 350-450 lb 32.50-34.60, including 2 loads 425-430 lb 33.85-34.60, 450-650 lb 29.50-33.20; good and choice 350-450 lb 30.50-32.75, 450-650 lb 28.00-30.50.

Others: Good and choice bull calves 31.00-35.60.

Cows: Late sales high dressing cutter and utility 21.00-22.00; utility 19.50-20.75, few low dressing 18.80-19.10; canner and cutter 16.90-20.60.

Bulls: Utility and commercial 25.00-27.50, few 28.00; cutter and low utility 22.00-24.50.

Hogs — Compared to late last week, barrows and gilts 50c to 75c higher; sows steady; boars 50c lower. Salable receipts near 4,500 head compared to 6,000 head a week ago and 3,400 one year ago. Barrows and gilts: Closing prices:

US 1-3 190-255 lb 20.00-20.75; US 2-3 190-255 lb 19.25-19.75; US 2-3 250-270 lb 18.75-19.50.

Sows: US 1-3 270-500 lb 15.00-16.00; US 2-3 500-600 lb 14.50-15.00.

Boars: All weights 9.00-11.00.

Sheep slaughter and feeder lambs mostly 50c lower, slaughter ewes poorly tested, weak to 50c lower.

Spring slaughter lambs: Choice and prime 75-105 lb 28.00-28.50; good and choice 26.50-27.50.

Slaughter Ewes: Cull to good 2.00-5.50.

Feeder lambs: Choice and fancy over 70 lb mostly 24.50, under 70 lb 21.00-22.00, few 22.50.

Omaha Cattle

Thursday, July 8

Closing prices on slaughter steers and heifers, steady to 25 higher advance mainly on Choice and Prime. Cows weak to 50 lower. Bulls fully steady. Small feeder supply weak.

Three day receipts 15,900 as compared 20,000 previous week and 19,300 a year ago. Feeder Cattle trade followed a somewhat uneven pattern as result of poor distribution of supply following a long holiday weekend. More than 60 per cent of three day total arrived on Tuesday and prices were forced downward as buyers had ample selection from which to choose.

Mild early decline recovered at mid week, however, when marketing dwindled to 4,500 head. Slaughter steers made up approximately 44 per cent and heifers 35 per cent predominate Good to Average Choice with a noticeable increase in volume of Good and Low-Choice 800 to 850 pounds short fed heifers which met with generally narrow demand. Cows nine per cent, feeders eight per cent. Average cost slaughter steers for two days 31.57, average weight 1,112 pounds as compared 31.47 and 1,101 pounds previous week and 30.87 and 1,117 pounds a year ago.

Market Steers

Steers — High Choice and Prime, one load, U.S. 2-4, 1,199 pounds, 33.65; three loads U.S. 3-4 1140-1329, 33.10-33.25; 1125-1300, 32.75-33.00; Choice, U.S. 2-4, 975-1,300, 31.75-32.75; Mixed Good and Choice, 950-1,250, 13.25-31.75; Good, 27.00-31.25; Standard and Low Good, 26.00-27.00; Holsteins, 26.25-27.00.

Heifers — High Choice and Prime, two loads, U.S. 3-4 1024-1047 pounds, 32.90-33.00; seven loads, 917-1011, 32.15-32.40; Choice U.S. 2-4 825-1025, 31.00-32.25; Mixed Good and Choice, 775-975, 30-31; Good 26.50-30.00; Standard and Low-Good, 25 00-26.50.

Cows—Utility and Commercial 20.25-22.00; Canner and Cutter, 19.00-21.00; Mixed Cutter and Utility, 21.25-21.50.

Feeder Steers

Feeders prices on low supply weak supply largely High Good and Choice 825-1,000 pound steers and 725-850 pound heifers cutshipments approximately 1,-000 head compared 1,400 previous week.

Steers — High Choice and Prime 824-1051 pound, 29.00-30.50; Heifers-Choice 1 load, 457, 33.00; High Good and Choice, 726-862, 28.00-28.50.

Green Dragon Dairy Cattle

Friday, July 2

The Green Dragon market reported receipts of 175 head of better than average quality cattle, poor to average attendance, with prices steady.

Consignments included:

Herd Pennsylvania cows, fresh, 300-445; springers, 250-465; milkers, 225-382 50.

Load Pennsylvania cows, fresh, 440-645.

Load Canadian cows, fresh, 295-400; springers, 295-600.

Load Canadian cows, fresh, 375-640; springers, 345-490.

Load Pennsylvania cows, fresh, 270-595; springers, 345-490.

Load Pennsylvania springers, 300-500.

Local heifers, 250-372 50.

Colored cows, 200-315.

Beef Cows

Beef type cows sold lower in active market; feeder cattle steady.

Beef cows: Cutters, 22 00-25.50; Fat cows, 21.00-22 00; Utility, 19.00-21.00.

Stocker market: Holstein bulls, 24.00-27.00; Beef type bulls, 26.00-31.00.

Chicago Cattle

Monday - Wednesday
July 5 - July 7

Compared last Friday, slaughter Steers steady to 25c lower, slaughter heifers strong to 25c higher, cows steady to 25c higher, bulls steady

Slaughter steers experienced minor price fluctuations during the holiday shortened week On the post-holiday trade Tuesday slight declines were recorded in face of slightly expanded marketings, but a slightly stronger tone developed Wednesday when receipts were curtailed Slaughter heifer prices advanced Wednesday when heifer numbers continued to be below trade requirements

Receipts 80 percent slaughter steers, 17 per cent heifers, balance mainly cows Overall finish of slaughter steers about like last week with 18 per cent Prime and 70 per cent Choice, compared with 26 per cent Prime and 62 per cent Choice last year. Heifer supply mainly High Good to Low Prime weighing 800-1025 lbs

SLAUGHTER STEERS — Prime 1200-1350 lbs Yield Grade 3 and 4 33 50-34 00, near 20 loads at latter price, load 1303 lbs at 34 10 on Wednesday High Choice and Prime 1100-1400 lbs 33 00 33 50, with

Cut Your Pasture

Good pasture management calls for mowing your pasture every four to six weeks, starting in early June, according to Max Smith, Lancaster County ag agent.

The idea of mowing, Smith said, is to prevent the weeds and grass from going to seed and to encourage succulent new growth of the grasses.

Permanent pastures should be cut every four to six weeks from now until October, enabling a farmer to get the most from an acre of pasture.

The dried up clippings, Smith noted, will be eaten by the cattle like hay.

It is the responsibility of every landowner, including builders and other people who own land that is not farmed, to mow weeds and keep them from going to seed, Smith said.

Conservation District To Host Representatives

The Lancaster County Soil and Water Conservation District has scheduled a picnic for elected state and federal officials and their wives at the home of Sherman Hill, Millersville, at 6:30 p.m. August 11.

The purpose is to inform the representatives about the district program in conservation.

The picnic will include an explanation of the district's background, a rundown on the present program and an outline of future plans.

Produce Firm Is Cited Under Commodities Act

The produce trading license of P. & K. Produce, Inc., trading as W.D. Pope Co., Forest Park, Ga., was suspended May 21 for failing to pay a reparation award of $807 issued under the Perishable Agricultural Commodities Act, the U.S. Department of Agriculture reported.

Officials of USDA's Consumer and Marketing Service said the firm and its officers, directors and stockholders—George J. Krock, Mollie Bradley and Tommie Krock — are not entitled to conduct business subject to the PAC Act until the reparation award is paid and the license suspension is lifted. They may not be employed by another PACA licensee without USDA approval.

C&MS officials said a produce shipping firm of Berwick, Pa., complained that the Forest Park firm had failed to pay for a truckload of cabbage purchased. The firm was advised of the complaint, but did not answer the charges. USDA's Judicial Officer ordered payment of the full amount claimed due.

Reduce Egg Output, USDA Advises

To avoid the extremely depressed prices which occurred in the first half of 1971, egg production in the first half of 1972 should be reduced three per cent from 1971 levels, the U.S. Department of Agriculture recommends in its "Egg Marketing Guide for the First Half of 1972." Output at this level would result in per capita supplies near 1970 levels but below those of the first half of 1971.

Since the improvement in livability and production from the use of Marek's disease vaccine may largely offset the reduction of 10 per cent in pullet chicks started in the first half of this year, heavy culling during the rest of this year is recommended to achieve the three per cent reduction by January 1, 1972.

The replacement pullet hatch in the first half of 1972 should be at a level that will result in no increase in the number of layers in the flock. Where significant reductions in mortality are being obtained in growing pullets and in layers, a directly proportional reduction in the number of replacements started is recommended.

The earlier recommendation of no change in the July-December 1971 replacement hatch from a year earlier is revised to recommend a reduction of six per cent. This revision is in recognition of the size of the first half hatch, the difficulty in reducing the size of a young flock through culling, and the higher level of performance from the use of Marek's disease vaccine.

Copies of "Egg Marketing Guide for the First Half of 1972," PMG-21, which contains detailed information on the recommendations, may be obtained soon from the Information Division, Consumer and Marketing Service, U.S. Department of Agriculture, Washington, D. C. 20250.

Miller, UGI home economist, and Donald Robinson, Garden Spot High School, New Holland, vo-ag teacher

Most of the blue ribbon winners will compete in the district 4-H demonstration Wednesday, July 14 at Owen J. Roberts High School, Chester County The judges commented on each presentation and emphasized that all the demonstrations were very well done and had much educational value.

Correspondence Courses

It's home improvement time Your plan may be as simple as a fresh coat of paint or as elaborate as a plan for remodeling

Whatever your plans are for making home improvements, you'll want to know the right way to avoid costly mistakes.

Two courses to guide you in making improvements around your home are available from Pennsylvania State University

One course titled "Improving House and Grounds" gives practical ideas for making homes more livable and home grounds more attractive In addition to a discussion on remodeling and seven steps to more beautiful home grounds, efficient planning of bathroom, kitchen, and making storage areas more usable is discussed The course sells for $2 65

The other course is "House Furnishings" and begins with a discussion on planning It continues with color, texture, arrangement, lighting, windows, accessories and carpets and rugs This course sells for $3 45

If bought together, you may have both courses for $5 50 You'll want to study both courses if you plan to redecorate, remodel, or add furnishings to your home Make check or money order payable to Penn State and send to Home Improvements, Box 5000, University Park, Pennsylvania 16802

Using Yesterday's Methods To Build Tomorrow's Beef?

Are you profiting from the latest rumen nutrition findings? They prove conclusively that you can build beef *faster,* with *less* feed, on "protein variety" instead of the old fashioned "single protein" supplement (such as soybean meal). Wayne Beef Balancers are in tune with the times. Let their appetite-stimulating ingredients and tested, protein-varied contents, with stilbestrol, aureomycin and cost-cutting urea, get *your* beef to market faster. Formulated to fill your individual feeding needs. See us!

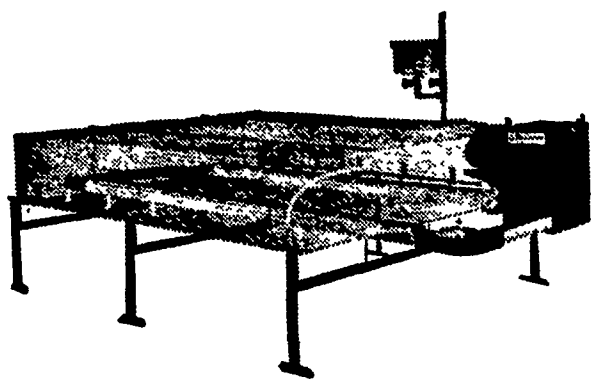
"CHIK-EZE"

Hinged bottom model Chik-Eze includes egg tray which can be put into use at 10 weeks.

This feature will actually permit birds to be kept in the start/grow cage at full laying age if necessary. It also eliminates problems of egg gathering and egg breakage if circumstances delay movement of pullets to grow/lay or permanent lay cages, and it takes care of eggs from birds that lay prematurely. The lowered floor provides a 2 inch gap for eggs to roll out onto tray.

THE ALL NEW FLAT DECK CHIK-EZE PULLET REARING CAGE



. . . offers durability, economy, performance and practical labor saving features that increase management efficiency. The heart of the system is the Big Dutchman chain and trough feeder providing 96 inches of feeding space per cage. There is full availability of all the feed to all the birds. All feed is automatically recirculated and remixed, resulting in better feed consumption.

Extra feed capacity makes high density of birds per cage row practical and manageable.

USDA Egg Market Continues, Changes Made

Some changes, particularly in Chicago reports, will be made in the U.S. Department of Agriculture's egg market news reports but they will not be discontinued.

United Egg Producers, a nationwide cooperative of egg producers and marketers, had asked USDA to modify it's market news reports, and in March USDA asked for comments on UEP's proposal

As a result of approximately 1,100 comments on the proposal and a thorough study on the egg market news reports by USDA's Consumer and Marketing Service, which conducts the market news program, the following changes will become effective July 6, 1971.

In Chicago, the wholesale daily report will be replaced by twice-a-week reports on Wednesday and Friday since the volume of loose eggs handled in Chicago is not always sufficient to issue a valid daily report on all grades and sizes The price range will be narrowed by eliminating the extremes when it is obvious that such prices are out of line with the normal market. The weighted average price will continue to be reported but only twice a week rather than daily.

In New York City, there is sufficient volume of product handled daily to warrant continuing the daily wholesale price report The full range will be narrowed by eliminating the extremes, and the "mostly" report will be continued

The daily report of cartoned egg prices will be continued in all markets However, extremes in the reported range will be eliminated

Market condition reports will be continued

These changes with further details were scheduled for publication in the Federal Register May 29,1971

Tree Seedling Prices Up

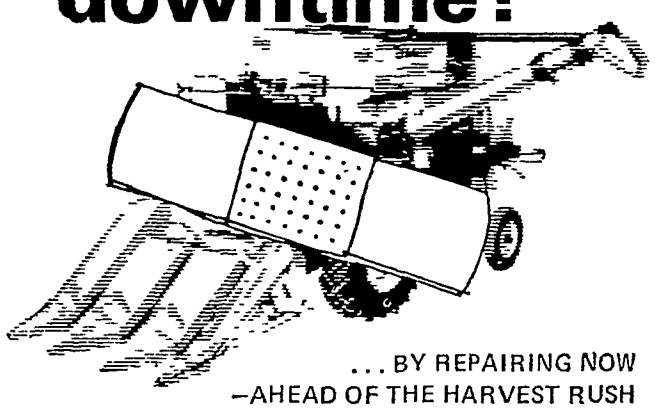
Tree seedlings grown and sold by the Bureau of Forestry, Department of Environmental Resources, have increased in price from $6 per thousand to $10 per thousand, because of increased nursery production costs.

Hybrid poplar cuttings which were formerly $15 per thousand have been increased to $25 per thousand. Delivery charges for hybrid poplar cuttings, and seedlings of $1 per thousand for transportation to each county distribution point remains unchanged.

Tree seedlings and hybrid poplar cuttings are distributed by the Bureau of Forestry in the spring only when better survival and early growth is obtained. Orders are for a minimum of 1,000 seedlings or 500 hybrid poplar cuttings, and are available for purchase by Pennsylvania landowners. Under public law, these trees may be planted for watershed protection and wood products. Prohibited under the law is their use for windbreaks, ornamentals and Christmas trees.

One thousand seedlings when planted at the recommended spacing of eight feet by eight feet will occupy one and one-half acres of ground. Application forms and tree lists can be obtained beginning this fall from any of the 20 district foresters offices, or directly from the Nursery Office, Department of Environmental Resources, Box 1467, Harrisburg, Pa., 17120. Applications should be received no later than March 1, 1972, for processing.

Do away with downtime!



. . . BY REPAIRING NOW
—AHEAD OF THE HARVEST RUSH

DON'T head for trouble when you head into this harvest season. Check over all your harvest equipment now . . . or call on us for a complete inspection. Any problem discovered and corrected now can cut down on costly downtime during harvest.

Plan ahead for a fast, profitable, trouble-free harvest by scheduling your equipment for a pre-harvest inspection today. Better yet . . . do it right now.

ASC Payments Being Made

The 1971 wheat and feed grain set-aside program payments are being made in July according to Fred G. Seldomridge, chairman of the Lancaster Agriculture Stabilization and Conservation Committee (ASC).

Preliminary wheat payments, according to the 1970 Agricultural Law, will approximate 75 per cent of the total earned wheat payment. Preliminary payments, now being made, are computed at a rate of $1.20 per bushel of wheat eligible for payment.

Final wheat payments will be made after December 1, 1971. Total certificate value will be the difference between the July 1 parity price for wheat and the average July-November 1971 market price. Final payment will be the difference between the final certificate value and the preliminary payment.

1971 feed grain set-aside payments are also being made by local ASCS offices, Seldomridge said. Corn payments are computed at 32 cents per bushel on the esiimated producton oif 50% of the corn base for participating farms. Sorghum payments are computed like corn, but at 29 cents per bushel.

These payments are made to reimburse farmers for the cost of idling unneeded productive cropland acres, according to Seldomridge.

The 1971 voluntary set-aside program takes cropland out of production which is not needed for food and fiber production in the U.S. The program prevents production of surpluses which become a burden to all U S. taxpayers and prevents disastrously low farm income, the Chairman added.

Penna. Grange Cites Couple

Work among young married couples in the Pennsylvania State Grange for 1971 will be headed by Mr. and Mrs. Henry T. Huber, West Chester, A. Wayne Readinger, master, said recently following their election as "Young Couple of the Year."

Both are active in Goshen Grange, No 121, at West Chester where Huber is circulation supervisor for the Daily Local News. Huber is master of his grange. Mrs. Huber holds the office of Ceres and serves also as Pomona in Chester-Delaware Pomona Grange. They have two children, Ellen Marie and Peter.

Lanchester Pony Club Competes

Lanchester Pony Club was represented at the "C-1" and "D" Regional Rally on June 21, 22, 23 at Runnymeade Farm. The "D" team consisted of Rick Rankin, captain, Vicki Armstrong, Liza Kolb, Doug Gibson and stable manager was Mary Cappy. Chaperone was Mrs Francis Hill.

On the "C-1" team was Kathy Myer, Sally Lane (captain), Carol Myer, Maureen Little and stable manager was Hazel Lowe. Chaperone was Mrs. John Henkel.

These two teams did not place, but they had a great time riding and enjoyed the beautiful scenery.

The C-2, B and A Regional Rally took place June 28, 29, and 30, at Ludwigs Corner.

Lanchester C-2 team consisted of Patti Hassler, Nancy Henkel, Mary Beth Little, Phyllis Rambo and stable manager was Liz Farmer. Chaperone was Mrs Hoopes Yarnell. This team was second, only one point away from first place.

The B team which took first place, was represented by Ralph Hill, Wendall Lane, Terri Moore and Laura Lane was stable manager. Chaperone was Art Groy. This was Lanchester's winning team.

C-2 individual rider was Patti Yarnell.

The "B" team will go to the National Pony Club Rally which takes place in Ohio, starting August 9.

Penn Manor FFA students who received awards in contests last week at FFA Activities Week at Penn State include: left to right, Dave Hess, 11th grade (in the fall), first in livestock, will represent Pennsylvania in livestock judging at Kansas City, Mo.; Glenn Rohrer, 12th grade, bronze medal in dairy products; Parke Hess, 11th grade, first in poultry judging, will represent Pennsylvania in poultry judging at Kansas City, Mo.; Jim Charles, 12th grade, fifth in poultry judging, will compete at Springfield, Mass.; Dave Gerlach, 12th grade, fifth in livestock judging, will represent Pennsylvania at Richmond, Va.; Cliff Charles, 11th grade, silver medal in livestock judging. Not shown, Clyde Erb, 12th grade, bronze medal in meat judging.

Missionary Assigned

Jane Myers, Mount Joy RD2, was among 14 new missionaries to receive assignments recently from the Eastern Mennonite Board of Missions and Charities.

She will teach in a business school in Mogadiscio, Democratic Republic of Somalia. She will leave in August.

Dreaming Animals

It is probable that most of the higher mammals dream. Sleeping dogs, cats, apes and horses, make sounds and movements similar to those of sleeping human beings, and it is reasonable to believe they are dreaming.

insects chewing tobacco?

Just spray Diazinon. That will stop insects like aphids, flea beetles, and grasshoppers. It will break their habit of ruining your crop.

Call on us for Diazinon, today.

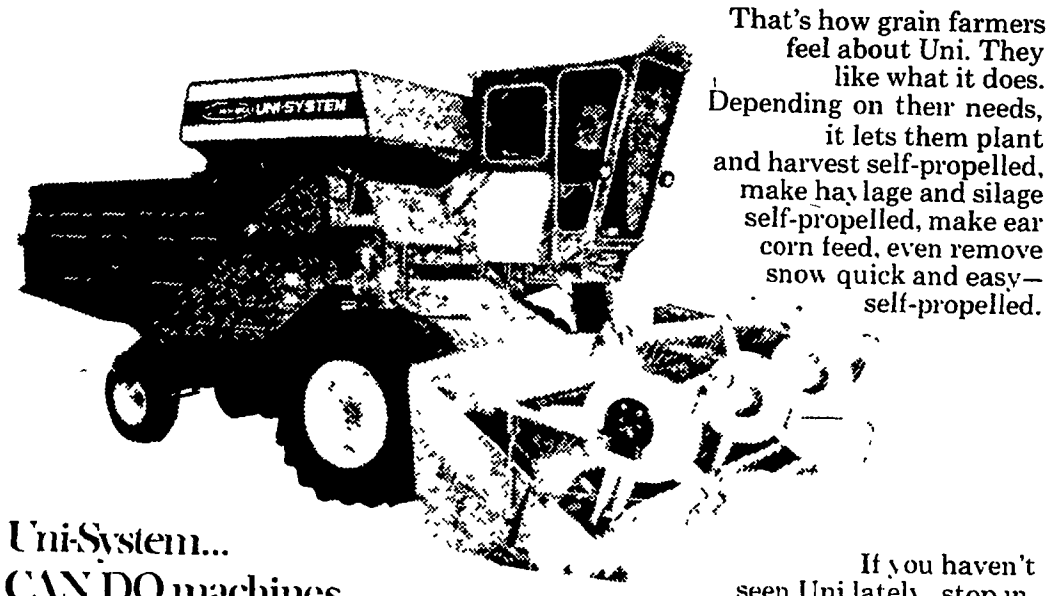
I can harvest all my crops self-propelled with Uni. And at real savings. I run about 100 acres of corn through my Uni-Sheller; the rest through my Uni-Picker. My soybeans, *well,* I get them with my Uni-Combine. I also do a lot of custom work.

can you?

Oliver Johnson, Grain Farmer



That's how grain farmers feel about Uni. They like what it does. Depending on their needs, it lets them plant and harvest self-propelled, make haylage and silage self-propelled, make ear corn feed, even remove snow quick and easy—self-propelled.

Uni-System...
CAN DO machines
from the CAN DO people.

If you haven't seen Uni lately, stop in. It's the coming thing and we're trading big.

Schneck and Harnish Join Agway in Salunga Area

Norman Schneck

Earl (Doc) Harnish

Norman Schneck and Earl (Doc) Harnish have joined Mark Hess and Wilbur Hiestand in serving farmers in the Salunga area, Agway, Inc., has announced.

Schneck is a native of Lehigh County He is moving to Lancaster County from Hickory Corners, where he was a manager of the Dalmatia store.

Harnish is a native of Lancaster County.

Harnish and Schneck have a combined history of 60 years serving farmers' needs. Hiestand joined Agway about a year ago

Mark Hess

and Schneck has had 18 years service with Agway

Harnish is bringing to the Salunga area those programs

Wilbur Hiestand

that he, other local farmers, and Agway have developed throughout his 10 years experience with Agway His past experience as a successful local dairyman have given him the practical application of new programs as they develop ,

Hess, a Lancaster County native, owns a farm which has been in the family since the original purchase from the William Penn Land Grant in 1754 He started the Tobacco Marketing Operation in 1963 and is still active in this Agway service

In addition to Salunga, Hess has management responsibilities that includes Agway stores in New Holland, Quarryville, Lancaster and Willow Street

Cigar Week Declared

Governor Milton J Shapp has declared October 18 to 24 Cigar Week in Pennsylvania

Shapp noted that 55 per cent of all cigars manufactured in the U S are manufactured in Pennsylvania and over 48 per cent of the nation's cigar leaf tobacco is grown in Pennsylvania In addition, the cigar industry employs tens of thousands of manufacturers, growers, wholesalers, retailers, and related suppliers

Cigar tobacco growing and manufacturing have been carried on in Pennsylvania since colonial times

Corn Outlook Still Favorable

Reports so far indicate that the Southern Corn Blight is spreading into all parts of the country.

While this is not encouraging, the reports also indicate that the number of fields infected is not large and that the infected fields are widely scattered, except in some areas, mainly in Indiana and Illinois. Except for the Southern states, which were hit hard last year and turned largely to resistant seed this year the heaviest rates of infestation appear to be generally in the same areas that were hit hardest last year.

It would appear that most of the infections which have occurred have stemmed from shelling and moving corn which was infected last year.

We're not sure what this means yet. One obvious recommendation which has already been made many times is that farmers should not shell or handle blighted corn in such a way that it will contribute to the spread of blight.

We recognize, however, that this may run contrary to economical management on the particular farm. Animals simply have to continue eating and economy dictates that the farmer continue using management practices and equipment which is available to meet the needs.

However, the farmer should weigh possible adverse effects on his corn crop of spreading blight against additional costs which may be incurred in using other feed sources until the present corn crop matures.

Based on reports so far this year and experience gained last year, we believe that it is too early to predict what the blight will do to the crop this year.

It would appear that the blight needs moist conditions to spread effectively. Moist conditions in corn fields usually do not occur extensively until the corn crop is near maturity. As the stalks near full growth and the corn begins to form—this is the period when the ground will be shaded and moist conditions can occur. The extent of moisture, however, will depend very heavily on weather.

With hot, dry weather, blight apparently would have a hard time causing much damage. But with cloudy, humid and wet weather conditions would be ideal for spread of blight and damage to the corn crop.

Weather so far has been nearly ideal for corn production and the crop is off to a vigorous start. This in itself should be favorable. Healthy and vigorous corn, as well as early corn, we are informed, is much less subject to blight than corn which is under stress and late in maturing.

Overall, despite early infestation, reports so far indicate that the local corn crop outlook continues to be. favorable. While this could change rapidly, we think farmers should still be optimisitic at this time.

Water Pollution -- What to Do?

Our report in the July 3 issue on the water survey by elementary agricultural students in the Eastern Lancaster County School District may have presented some surprises to some of our readers.

But the basic finding that about half of nearly 800 water systems checked in the New Holland area are polluted actually is not news to many officials who are aware of Lancaster County geology and water tables and conditions. Many of these officials have been saying for years that a very high per cent, possibly half, of all non-public water systems in the county are polluted.

The importance of the Eastern School District survey is that it is the first extensive and reliable survey which has been made to confirm what has always been suspected.

While it is obvious that many citizens have been using polluted water for years without any known adverse effects on health, it is also true that in some instances polluted water has been at least a contributing factor in adverse health. In addition, polluted water poses future disease and health problems.

Looking to the future, it is clear that as farm operations, particularly the number of livestock and volume of animal waste, increases along with new residential development, the pollution problem will grow.

Actually, the pollution problem will likely grow much faster than the numbers of animals and people because of build-ups of pollution which already exist and because nature tends to purify a certain level of waste, but at a certain point it cannot do so any longer. The evidence is growing that the point at which nature can take care of the pollution problem has already been passed.

The key question, of course, is what to do about the problem.

We suggest that at the very minimum, persons using well or spring systems be aware of whether their water is polluted by having periodic tests made. This way, if health problems do occur, the water can be checked out as a possible source of the problem.

Better still, possible clearing up of the problem should be studied. Sometimes, the water system can be improved to eliminate sources of contamination. Or we understand that chlorinators or ultra violet light systems can be installed to eliminate problems stemming from coliform.

In attempting to solve the problem, care should be taken to deal with reliable persons to make sure there really is a problem and that any actions taken actually do solve the problem. Reliable laboratory analysis is just as important in evaluating the condition of water as it is in determining the condition of soil and fertilizer needs.

If the problem is high nitrate count, however, it cannot be economically treated in a private water system. Since nitrate poisoning can be fatal to infants during their first few months of life, persons with infants on water systems with high nitrate counts should definitely find an alternative water source during the crucial period of infancy.

Farmers should keep in mind that animals can also be poisoned by high concentrations of nitrates in water. While we have no indication that this is a factor in animal deaths locally, it should be considered as a possibility if unexplained deaths do occur.

An obvious solution is a public water system. However, this is extremely expensive and impractical in most rural areas.

While there is no uniform solution to this problem of contaminated water, farmers should remain aware that the problem is extensive and can affect both their families and their farming operations.

To Control Wasps

Hornets, yellow jackets, and wasps are all of the wasp family and should be controlled. They are getting more common in many areas and often attack humans and may cause serious illness. Most of these stinging insects may be eliminated by spraying their nests at night, when there is less danger of getting stung, with a chlordane spray; aersol bombs may be bought containing materials to kill all members of the wasp family. It is suggested that heavy clothing and a bee veil be worn to reduce danger of serious stings.

To Beware of Lightning

An old saying that lightning never strikes in the same place twice may be true, but it is certain that some places are more dangerous than others during electrical storms. The greatest danger period is just before the rain begins to fall. Single trees out in the open or wire fences are especially dangerous places during electrical storms. It is not uncommon for a single bolt of lightning to kill a group of cattle under a tree or along a wire fence. When losses do occur, farmers are urged to get a veterinarian examination to verify the cause of death; this will be needed for insurance claims.

To Draw Soil Samples

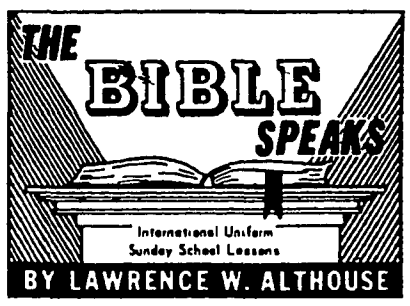
The summer seeding of alfalfa is less than a month away and small grain fields will soon be prepared for the fall seedings. To have a complete soil on this ground is good soil management and strongly recommended. Soil that needs lime should have it worked into the topsoil before the legume or small grain seeding is made. Lime and fertilizer go together for maximum crop yields.

Help Us Serve You

Don't assume we know about your farm organization's meeting. To get your meeting on our Farm Calendar, it's safer to assume we don't know.

Remind us by calling 394-3047 or 626-2191 or by writing to Lancaster Farming, 22 E. Main St., Lititz, Pa. 17543. You'll be helping us to serve you better.

P.S. — If you're not sure you told us already, we don't mind hearing from you again.



THE PROBLEM WITH GOOD MEN

Lesson for July 11, 1971

Background Scripture: Deuteronomy 17: 14-20, Judges 9 8-15, Mark 12 13-17; Romans 13-1-7, Timothy 2 1-6
Devotional Reading: Romans 12-1-13

Reinhold Niebuhr, the great American theologian, once noted that "not much evil is done by evil men." To the contrary, "most of the evil is done by good people who do not know that they are not good." Along this same line

Rev. Althouse

he concluded that the First World War had been "made inevitable not by bad people who plotted against the peace of the world but by good people who had given over their conscience into the keeping of their various political groups."

The problem with "fatness"

Niebuhr was commenting on the tragic tendency of Christians to "leave politics" to others. Many of the failures of our society can be attributed to a failure of Christian citizenship All too often we have been content to live our complacent lives quite indifferent to rendering any more to "Caesar" than we have had to.

This is the meaning of the parable which Jotham tells in Judges 9.8-15. The occasion of the parable is a crisis in the life of the Hebrew confederacy. Gideon, the great man of God, is dead. One of his descendents, Abimelech, an evil man, has successfully plotted the deaths of almost all Gideon's other descendents. Ruthlessly, he seizes power for his own selfish aims

Jotham, one of the few of Gideon's other descendents who escapes, tries to rally the good but indifferent men of Shechem. Abimelech's tryanny is possible, he realizes, so long as the men of Schechem fail to respond to his challenge. So he tells them a story of how one time the trees sought a king. Going first to the noble olive tree, they ask: "Reign over us" (Judges 9:8), but the olive tree responds: "Shall I leave my fatness, by which gods and men are honored, and go and sway over the trees?"

Unfortunately, the olive tree loved its prosperous existance and did not want it disturbed for the sake of exercising responsibility. The same was also true of the fig tree and the vine. Thus, because the capable trees refused to rule, the trees in desperation turned to one who was not fit to rule, but at least willing: "Then all the trees said to the bramble, 'Come you, and reign over us!" (9:14). And the least capable tree of all became the ruler.

Tyranny doesn't "just happen"

One of the things that this parable should teach us is that poor government, corruption, and even tyranny do not "just happen." We find ourselves ruled by evil men, very often, not because they have waged a campaign to seduce us, but because we have actively (not passively) allowed them to fill the vacuum of leadership in our communities and nations. In the parable, the bramble bush did not seek to become king; the trees turned to him because the capable trees could not be bothered with the responsibility

The problem with good men, all too often, is that they sit back and leave the world to those who are not good.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U.S.A. Released by Community Press Service.)

Prize Holstein to Be Sold at Black and White

This is Rockledge Idol Tracey, the prize 1970 Junior All-American two year old which will be the featured attraction at the annual Black and White Show and Sale July 16.

The animal was bought Monday by Charles C. Myers from Robert Bigsby, Lawrence, Kansas, especially for the annual show It will be one of 151 dairy cattle at the Lancaster sale.

Rockledge Idol Tracey has a number of awards besides 1970 Junior All-American, including first 4-H senior yearling and junior champion in 1969; reserve All-Kansas two year old in 1970, first place two year old at the Kansas All-Breeds Junior Dairy Show in 1970, first place as a two year old in the District Black and White Show and senior champion and grand champion in 4-H open competition in 1970, first in class and reserve grand champion in the Mid-America Fair, and other awards

As a two year old, Tracey produced 13,800 pounds of milk and 630 pounds butterfat with a 4 6 per cent test in 299 days.

In 158 days of her second lactation, she has produced 8,310 pounds of milk and 369 pounds of butterfat for a 4 4 per cent test

She was bred April 14 to Osborndale Ivanhoe She was classified seven weeks after her first calf at 88 (Very Good).

Her sire was Pretz Burke Idol, which was purchased by the Atlantic Breeders Cooperative, Lancaster This bull is classified Excellent at 90.

Her dam is Rock Home Sky Clarice (VG), which has a lifetime record to date of 114,700 pounds of milk and 4,627 pounds of butterfat for a 4.1 per cent test and is still producing heavily.

Happy to help you.

When you get right down to it, all commercial banks offer pretty much the same services. Savings accounts, checking accounts, various kinds of loans and so forth.

So let's be honest. Is there a reason for you to bank at Commonwealth? Do we really have a competitive edge?

We think we do.

It's contained in the headline at the top of the message. We really are "Happy to help you."

At each of the 30 offices of Commonwealth National Bank, you really will find people who take just a little more care...people who give just a little more thought to their jobs...people who smile just a little bit more spontaneously and who work just a little bit harder for you.

Nor is this an accident. We planned it that way. We take great pains in our hiring, making sure we get people who like people. Then we train them —intensely—in the hundreds of little ways which make a customer's visit a little bit more pleasurable. Frequently, too, we reward them for doing precisely that.

"Happy to help you" is our bank's slogan.

It may not be the world's most glamorous slogan. But it does have one very simple, potent virtue.

It is true.

Come and see.

Clashing Thimbles 4-H

The Clashing Thimbles 4-H Club heard reports from Kris Stehman, president, and Vicki Siglin, secretary, about this year's happenings of the 4-H Club Congress at Penn State.

Candidates for this year's queen contest were elected. In the category of junior queen (ages 9 to 14) is Jill Blouch, while senior queen (over 14 years of age) is Kris Stehman.

County Council members are Joanne Metzger and Brenda Baber, with Vicki Siglin and Linda Leaman as substitutes.

Mount Joy 4-H Stitchers

The third meeting of the Mount Joy second-year 4-H Sewing Club was held July 6 at St. Mark's United Methodist Church with 21 girls attending.

Beverly Garber, president, called the meeting to order and led the group in the 4-H pledge. Susan Miller, secretary, had roll call and read the minutes.

Wendy Garber, assistant treasurer, gave a report and orders were taken for 4-H pins.

Martha Garber talked about choosing the 4-H Queens. The meeting was adjourned.

The next meeting will be held July 13 at St Mark's.

News Reporter,
Barbara Miller

Classy Clippers Club

Thirty four members of the Landisville Classy Clippers Club answered roll call at the weekly meeting.

The following members presented demonstrations: Kathy Brubaker, Cynthia Sell, Doris Stubbs, Karen Newcomer, Mary Ellen Roth, Andrea Hess, Debbie Bare, Cheryl Sell and Mary Ann Geiger.

Orders were taken for hoagies to be sold by the Lancaster County 4-H Council.

The club will meet Wednesday, July 7 from 9 to 11 a.m. in Hempfield High School.

For good production next lactation,

FEED PURINA DAIRY CONDITIONER

As a dairyman, you know that good milk production doesn't just happen. It's something you plan for by establishing a herd with the genetic potential for good production, then managing and feeding your cows so they'll produce up to their bred-in ability.

Many successful local dairymen also plan for good production with a proven program of dry cow feeding. They need Purina Dairy Conditioner, a research-proven ration to help give dry cows body condition they need for good production after they freshen.

Purina Dairy Conditioner is an extra-palatable 12½ percent protein ration. It's fortified with vitamins A and D plus extra phosphorus to help guard against milk fever.

Purina Dairy Conditioner is low-cost, too, because the amounts you feed depend on your cows' condition and on the quality of the roughages you feed. For example, a cow dried off in good condition being fed high-quality roughages would require less Dairy Conditioner than a cow in only fair condition being fed fair quality roughages.

Drop in soon and get your free copy of the Purina Dry Cow Program folder. We'll be glad to show you how Purina Dairy Conditioner can help you prepare your dry cows for good production next lactation.

CUSTOM NO-TILL CORN AND SOYBEAN PLANTING

Arcadian Liquid.

Now's the time to give corn a good start.

Plant and feed more acres per day with liquid starter. Seedlings develop faster, roots grow bigger, maturity comes earlier when you plant and feed an Arcadian SLF premium liquid starter. It provides the nourishment germinating seeds need for a vigorous start in the critical early stage of growth. High analysis phosphate from POLY-N®, Golden URAN® liquid nitrogen, potash, secondary elements, micronutrients, even pesticides, can be prescription-mixed to suit your soils and crops. And SLF liquid saves time and labor. The Gumz Farms in Indiana, plants 1300 acres of corn 50% faster since switching from dry to an SLF liquid starter. If you want to get your corn off to a running start, then count on us and SLF premium grade liquid starter.

New Cooperators

The Lancaster County Soil and Water Conservation District has listed the following new cooperators

John A Thomas, 48 acres, Pequea Township, Glenn G Herr, 48 acres, West Lampeter Township.

Corn Blight Spreads, But Impact Still Minor

Instances of Southern Corn Leaf Blight infection have been verified in about 422 counties in 26 States, according to the National Federal-State Information Center for Corn Blight.

This represents an increase of two States—Minnesota and South Dakota.

Reports from most States emphasize that the overall infection is still light, often occurring in only a few fields within a county. The blight appears to be further developed in southern Illinois and southern Indiana than in other areas Most of the new counties reporting blight are in Iowa and northern Missouri.

Although field-to-field spread of the disease is taking place to a minor extent in some areas, there is no widescale spread of the blight. Most infection, plant pathologists emphasize, has resulted from diseased debris remaining from the 1970 crop, and occasional crib shelling or corn loading operations.

To serve the Lancaster County farm community better, we maintain two phone numbers. Our main number is 394-3047. But our subscribers and advertisers can also reach us through 626-2191 (ask for Lancaster Farming) and avoid a toll call from the Akron, Ephrata and Manheim exchanges.

'Favorite Recipes' Column Features Picnic Salads This Week

As the hot and lazy part of summer approaches, your family may want to take advantage of the weather with an occasional picnic.

Picnics can be enjoyed by everyone, both children and adults.

No picnic is complete without a delicious salad.

Our readers have forwarded several of their favorite recipes for consideration during your next picnic.

But before we present these recipes, we want to remind that our next "Favorite Recipes" column will be July 24 For this column, we will feature outdoor meat recipes.

This is also the time of year for cooking outdoors This can be a good family past time either at home or away on a picnic outing

There's nothing better than some freshly grilled meat outdoors after a hard days work

Send your favorite outdoor meat recipe to Lancaster Farming Recipes, Box 266, Lititz, Pa , 17543 We are continuing to send a potholder with the Lancaster Farming emblem to those who send recipes, limit of one per household

Back to the subject of salads, Mrs. Isaac B. Good, Stevens RD 1, sends her original recipe which she calls "Delicious Potato Salad" as follows:

Delicious Potato Salad

Salad:
- 4 cups cooked diced potatoes
- 2½ cups chopped celery
- ⅔ cup shredded carrots
- ¼ cup chopped onion
- 2 tablespoons chopped parsley
- 6 hard cooked eggs, diced or mashed.

Dressing
- 1 cup plus 1 tablespoon Miracle Whip
- ⅔ cups sugar
- ⅔ cup vinegar
- 1½ teaspoon salt
- ¼ teaspoon pepper
- ¼ teaspoon paprika
- ¼ teaspoon celery salt.

Combine first six ingredients after the potatoes and eggs are thoroughly cooled.

Prepare dressing by combining Miracle Whip and sugar; add vinegar and remaining seasonings and stir until well blended. Combine dressing with first six ingredients and chill.

Serves 10 to 12.

Note: 4 cups cooked and drained macaroni may be substituted in place of potatoes.

* * *

Mrs. J. N. Shirk, Leola RD1, has a delicious potato salad recipe "for those who don't like mayonnaise" as follows:

Potato Salad

- 2 quarts cooked, diced potatoes
- ½ onion
- 5 hard cooked eggs
- 2 tablespoons finely chopped celery

Salt and pepper to suit taste.

Dressing:

Beat all following ingredients together and put in double boiler, stirring till thick. Then cool and add to potato mixture:
- 1 cup vinegar
- 4 teaspoons cornstarch
- 4 teaspoons butter
- 2 cups sugar
- 4 eggs

Cream may be added before serving

* * *

Mrs. Ira H. Davis, Quarryville RD1, forwards her easy-to-make "Quick Picnic Salad" as follows:

Quick Picnic Salad

Use number two can sliced or chunky pineapple (well drained). Add one can of cherry pie mix or make your own while cherries are in. Add 1½ cups small marshmallows and two sliced bananas.

Combine all. The pie mix makes the dressing.

Especially good with a ham dinner.

* * *

Mrs. Herbert D. Eyman, 146 W Franklin St., Strasburg, has another quicky which she calls "Kidney Bean Salad" as follows:

Kidney Bean Salad

1 can Kidney Beans
Onion and mayonnaise to taste.

Drain juice from beans and spray with water until beans are free from all juice.

Then mix onion and mayonnaise as desired. This can be mixed at the picnic.

* * *

Recently our column featured cherries. Mrs Eyman combines cherries and salads in the following easy Cherry Salad recipe:

Cherry Salad

1 pint sweet cherries, drained
1 small can crushed pineapple, drained
1 pack Strawberry jello

Make jello as directed using juices from cherries and pineapple. Mix all together.

* * *

Thelma L. Pannebecker, Reinholds RD1, has a Hawaiian Salad which she notes as "A favorite of my family to take to a picnic":

Hawaiian Salad

- 2 small packages orange jello
- 2 cups hot water
- 1 can frozen orange juice

When this is almost set, whip until fluffy. Add 1 cup of whipping cream that has been whipped or one package of Dream Whip or Ready Whip mixed as per directions on package.

Add:
- 1 tablespoon salad dressing
- 1 cup miniature marshmallows
- 1 cup pineapple ((crushed or tidbits), drained
- 1 small can Mandarin orange sections, cut in half, drained

Drain juice from the oranges and pineapple before adding to the jello mixture.

Pour into a 9 x 13 inch pan or mold as desired.

THE ENERGY OF MAN
VISIT PP&L'S
"ENERGY OF MAN" EXHIBIT TRAIN
Now through July 30
at the
STRASBURG RAIL ROAD
Located on Rt. 741 East of Strasburg

A lively, colorful history of man s harnessing of energy through the ages, coupled with a view of our nuclear future. See nineteen major display units in all, including a model of the nuclear Boiling Water Reactor PP&L plans to build at the Susquehanna Steam Electric Station, the "raw energy chamber" and a short but entertaining slide presentation.

The housing for the exhibit is unique, too: three remodeled and refurbished railroad passenger coaches.

Come see it! It will be an educational and entertaining experience for the entire family.

OPEN TO THE PUBLIC
9:30 A. M. to 8:30 P. M. DAILY
11:00 A. M. to 8:30 P. M. SUNDAY

Farm Women Societies

Society 1

Farm Women Society 1 held a covered dish picnic at the Middle Creek Church pavilion. Thirty-five members and guests were present.

Mrs. Graybill Hollinger, president, conducted a short business session and made these announcements. County picnic will be held on Aug. 4 at the Manor Camp Meeting grounds, starting with a covered dish at noon. It was also announced that a Farm Women's Camp at Camp Swatara will be on Aug. 22, 23 and 24. This is for all Farm Women Anyone interested may contact Mrs. Daniel Brubaker, Ephrata RD1, as soon as possible

Miss Rachel Bollinger had charge of the games for the picnic with prizes being won by Mrs. Graybill Hollinger, Mrs. Daniel Brubaker, Miss Donna Walton, Miss Lynn Groff and Mark Walton.

Society 1 will be entertained at 7:30 p.m. on July 12 by Society 31 at the United Methodist Church, Quarryville.

Next meeting will be at 12.30 p.m., Aug. 7 when Society 1 will entertain Society 9 at the home of Mrs. Noah Kreider, Manheim RD3.

Society 26

Farm Women Society 26 met at the home of Mrs Kenneth Martin, Lititz RD2, with Mrs. James Buckwalter as co-hostess. Mrs. Rodger Thome was in charge of devotions

Mrs. Robert Summy, president, was in charge of the meeting A bus trip to Ocean City, N J , is planned for July 22 Anyone interested in going should contact Mrs Leroy Esbenshade, Manheim RD1, before July 10.

Mrs. Clyde Buchen will represent Society 26 in the "Farm Women of the Year" contest The program was the wearing or showing of wedding dresses by members.

The next business meeting will be at 7 30 p m August 26 at the home of Mrs Amos Landis Lititz RD3.

Society 28

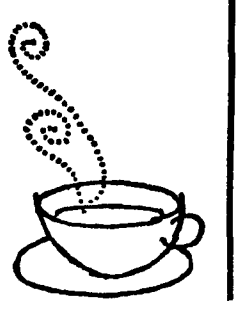
Farm Women Society 28 met at the home of Mrs. Christ Landis, 88 Glendale Drive, Lancaster, with Mrs. Donald High serving as cohostess. Mrs. Jacob Bare was in charge of devotions.

Trooper Rowlands of the Lancaster Barracks, Pennsylvania State Police, presented an informative discussion on self defense as the feature of a safety program.

Mrs. William Dean Jr., president, was in charge of the business meeting. Mrs. Harold Rohrer was selected to represent the Society in the Farm Women of the Year contest.

Husbands will be guests on July 24 to attend the play "Rose Marie" at the Longwood Gardens open-air theatre.

Ladies, Have You Heard? . .



By Doris Thomas, Extension Home Economist

THOMAS

What's New In Automatic Washers?

Innovation is the word with laundry equipment. One manufacturer has a laundry center that combines, in a single cabinet, an electric dryer positioned atop an automatic agitator washer Both units can be operated independently or at the same time.

Another manufacturer has a duo-load, double-tub washer which does two completely different kinds of loads at the same time, separately and automatcially. The two-tub design, with no interchange of water or washing aids between the loads permits simultaneous washing of colors and whites, delicate and sturdy fabrics, or heavily and lighted soiled clothes

Another new automatic washer features two agitators—one inside the other. The outer agitator is removable and you use the inner agitator for laundering delicate fabrics and lightly soiled garments.

A new requirement for all washers in a tub break or a method of preventing the lid from being opened during spinning. Underwriters Laboratory makes this safety feature mandatory beinning March, 1971,

Many washers today provide some method of soaking automatically and consumers are requesting this feature The methods vary from manufacturer to manufacturer. Research by home economists has shown that soaking does have merit for many types of clothes loads and for some stains.

Naturally, a sufficient amount of the right laundry product is necessary for good results

What's New In Dryers?

The sale of regular dryers has really boomed since the advent of durable press Now about 40 per cent of American homes have dryers, with electric dryers being the most popular

Many people buy washer and dryer as a pair so they'll match This may be important to you if you plan on locating your equipment in your kitchen, laundry center or bathroom as opposed to a basement area where color and style aren't noticeable You'll find that both washers and dryers are more highly styled than they used to be You can even find color and wood grain finishes and other decorative touches on many models

Dryed drums are larger than they used to be, and some are being made still larger as companions to larger washers Remember that there is no standard in the laundry equipment industry for load size in either washer or dryers The best way to load your washer or dryer is by volume or bulk

The least expensive dryers will usually have a timed cycle More expensive models will have automatic cycles, durable press cycles and time cycles with heat selections suitable for the load Durable press cycles will have a longer cool-down period.

Dryers don't really have new innovations, but you'll find different features on different brands. Among the newer features are end-of-the-cycle signals for telling you when clothes are dry. This is especially important when drying durable press clothing

Modern dryers have less heat and more air flow than dryers made a few years ago If you had an older dryer that got quite hot, you might have gotten into the habit of using low heat selections for all loads But with a new dryer a low heat setting could be one reason for wrinkles in durable press Low heat is not sufficient for durable press

For the best results from a new dryer, follow the manufacturer's use and care instructions Remember, dryers have changed and your new dryer is not the same as your old one

Shenks Coming Home

Calvin and Marie Shenk, missionaries in Ethiopia, were scheduled to arrive in the United States Thursday. Their address until July 26 will be C Mylin Shenks, Route 2, Willow Street, Pa. 17584. After that their address will 1918 Willow Street Pike, Lancaster, Pa. 17602

Ida's Notebook

By Ida Risser

Recently, I awakened to hear the whistle of a bobwhite in the distance.

When I work outside, I often answer his call. A few days ago, I was flattered when my son asked me if I'd been whistling or if he had heard a real bobwhite as he was working at the barn.

So far, I've not attempted to imitate the frog's croak which puts me to sleep at night.

The night sound which I enjoy most is a spring across the Conestoga. The rippling water can only be heard in the quiet of darkness.

* * *

We've just had a nice visit with a 4-H'er from Wisconsin. He came from a dairy farm and gave us a wide variety of cheeses. Our children and he swam and played and worked. We even managed a day at the shore, so he could see the Atlantic Ocean Of course, we enjoyed the trip too.

Some of our former boys just didn't know why a bucket had a handle They walked idly beside my son who was carrying two five gallon pails

In past years, we had fellows who spent most of their time writing three letters a day to the girl back home, or spent all free time at the nearest gas station drinking cokes

Learning how others live is a worthwhile experience.

* * *

Farm maintenance is a full time job. E'ther the hay wagon needs new sides or the tractor needs a new hydraulic system If these are finished, it is time to lay a water line to the calves

There are few hours assigned to house repairs. However, our porch has been temporarily strengthened, and just in time.

I really didn't want a porch with a sag in the middle which would give the house a smile to welcome me home.

Farmers Urged to Report Crop Acreage

Feed grain and wheat farms not participating in the 1971 Feed Grain or Wheat Set-Aside Programs should report their acreage of these crops to their Agricultural Stabilization and Conservation Service (ASCS) office, according to Fred G. Seldomridge, chairman of the Lancaster County Agricultural Stabilization and Conservation Committee (ASC).

The Agriculture Act of 1970 requires 1971 feed grain and wheat acreage to be reported annually to ASCS offices by producers who wish to maintain wheat allotments and feed grain bases. Failure to report will result in a reduction of 20 per cent in 1972 wheat allotment and feed grain base history. If the crop is not planted or the farm operator fails to report acreage for a period of three years, the allotment or base for the applicable crop will be removed from the farm.

To receive full crop history credit for wheat, a farm must produce wheat acreage in excess of 90 per cent of the farm allotment annually. In the case of feed grains, producers must produce feed grain acreage in excess of 45 per cent of the feed grain base to receive full crop history credit, Seldomridge reported.

County ASCS offices have this provision a postcard report form to be completed, signed and returned to the county ASCS office. The form also requests acreage of oats, rye, barley, flax, and soybeans. This acreage will be used for statistical purposes by the U.S. Department of Agriculture, Seldomridge said.

Correct wheat and feed grain history for all farms is of value to farm owners, operators, and maintaining accurate county records.

Seldomridge, Chairman of the Lancaster County ASC Committee, urges all producers to report acreage immediately.

African Swine Fever Invades Cuba

For the first time in history the most deadly foreign disease of hogs—African swine fever—has invaded the Western Hemisphere.

The USDA reports the disease is now in Cuba, where 15,000 hogs have already been slaughtered in Havana Providence and 7,000 in Pinar del Rio Province

Hog producers are being asked by USDA to be alert for signs of the disease and to notify animal health officials immediately if the disease appears.

African swine fever does not affect other animals or humans. It has been established in eastern and southern Africa for years and in recent years has spread to Portugal and Spain.

The disease is highly contagious and usually fatal. Signs are nearly the same as those for hog cholera, and the disease can be confirmed by a lab test.

Because of the presence of the disease in Cuba, USDA inspectors are giving close attention to imported processed meats, clothing, footwear and equipment.

The disease has shown up at a time when national efforts have nearly eradicated hog cholera in the States.

Start raising more and better Calves

the Easy NURS-ETTE way

No more carrying pails of warm water or hand mixing milk replacer. Just fill the hopper of the NURS-ETTE with milk replacer and the NURS-ETTE will mix milk replacer and warm water and keep it warm until calf nurses the mix (approx. 14 oz.)

Then it will mix a fresh batch of water and replacer.

BUILD YOUR MANAGEMENT-FOR-PROFIT PROGRAM AROUND PIONEER FEEDS...

Today's cows are capable of high level production — often as much as 2,000 lbs. more milk per cow per year than they are producing. PIONEER feeds and feeding programs can help you get those extra tons of milk from your cows. Challenge your herd. Feed the PIONEER way . . . find out how good your herd really is.

Stop in and see us. WE'LL help you develop an all around management for profit program that will put profit dollars in your pocket.

Huge crowds are attending the nightly religious services in the big tent located along Route 896 just South of Route 30 at the Guernsey barn.

The meetings, under the direction of George R. Brunk, Dean of Eastern Mennonite Seminary, will continue through July 18

The services are giving tourists to the area an opportunity to visit a Mennonite gathering.

200 to Attend Cooperatives Institute

Two hundred rural boys and girls from 58 Commonwealth counties and parts of New York State and New Jersey will gather Sunday (July 11) at Shippensburg State College for the 11th summer institute of the Pennsylvania Association of Farmer Cooperatives.

Six Lancaster County delegates attending the Institute are Clair Witwer, 617 Strasburg Pike, Lancaster; Kenneth E. Grube, 917 Pine Hill Road, Lititz; Debra A Gregory, Lititz RD1, Linda Stoltzfus, Mount Joy RD1; Nelson E. Martin, East Earl RD1, and Donald Breneman, Strasburg RD1.

The institute, which will run through Thursday, is sponsored by the farm cooperative trade organization and College of Agriculture of Pennsylvania State University.

Professor Hal F. Doran, of the Penn State Agricultural Economics Department, institute director, said the five-day program is designed to teach the delegates more about cooperatives and the free enterprise system in America. In addition, they will be informed of career possibilities in agribusiness and receive instruction in leadership responsibilities

Included in the delegation are 155 first-year scholars and 45 returning for the second time.

The second-year members, called agribusiness explorers, will take part in in-depth studies concerning cooperative business affairs. In charge of the explorers is Boyd C. Gartley, Inter-State Milk Producers Cooperative, Cochranville.

"Those participating in institute activities," Doran said, "are all winners of a local cooperative contest and chosen on the basis of knowledge of cooperatives and a summary of leadership activities. Delegates represent 4-H Clubs, Future Farmers of America, and Future Homemakers of America."

A Youth Council, consisting of delegates from each of the 23 participating local councils, will provide the leadership for many of the functions of the institute. Jay W Irwin, associate Lancaster County agricultural agent, will assist the council

Several of the conference speakers include Dr Gilmore Seavers, president of Shippensburg State College, John J McNulty, teacher, Brockway Area Schools; Dean Carey, president and general manager of Knouse Foods Cooperative, and Dr Clare A Becker and Dr William M Smith Jr, both faculty members in the Department of Agricultural Economics and Rural Sociology at Penn State

One of the conference highlights will be the selection of 10 delegates to participate in the annual meeting of the American Institute of Cooperation at Colorado State University, August 1-4

These delegates will be picked on the basis of their institute activities and scores of a cooperative quiz. They will join with 900 other agricultural leaders from the United States, Canada, and Puerto Rico at the Colorado meeting

On Wednesday evening and Thursday morning (July 14-15) agricultural leaders from all parts of Pennsylvania will join the delegates for the annual agleaders banquet and meeting. This group will discuss public responsibilities when conducting a cooperative business.

General chairman for the institute is Walter Z. Loy, of the Farm Credit Association, Carlisle.

PROPANE GAS

Bulk, Bottled Metered.

Serving Farm, Home and Industry in Lancaster, York & Lebanon Counties.

The Gerritt Boerema family, the winner of the Farmers Home Administration National Farm Family award, is shown June 30 inspecting a self-propelled haybine of the New Holland Division of Sperry Rand in New Holland. The firm sponsored an expenses paid trip by the family to Washington, D C. The Boerema family immigrated from Holland in 1949 and is presently operating a large dairy farm in the Lake Pungo and Phelps area of North Carolina. Left to right are: son Edward and Denny, Mrs Boerema, daughter Barbie and Renea, Roy Giesmann, Lancaster County FHA supervisor, and Mr. Boerema.

Feed Hens Sitosterol?

Hens on a diet containing sitosterol produced eggs containing up to 35 per cent less cholesterol than eggs laid by the same hens when on standard rations, Kansas State University research has revealed.

Sitosterol is a fatty substance found in soybeans and other plants It's been used successfully as a drug to lower blood and tissue cholesterol in humans.

Besides lowering cholesterol in the egg, it's expected that even a small amount of sitosterol present simultaneously in the egg along with cholesterol can prevent much of that cholesterol from being absorbed in the human intestine.

Changing Climate

At the present time, the earth's climate is far more rigorous and marked by greater extremes of heat and cold than it has been for the last 500 million years.

Spice CABINET

COL. SANDERS' BISCUITS

2 cups flour
½ tsp. salt
1 tsp. baking powder
1 (heaping) tbsp shortening
1 cup buttermilk

Preheat oven to 425 degrees. Sift flour, salt and baking powder together. Cut in shortening; add buttermilk; mix and roll out on floured board to about ½-inch thickness. Cut out biscuits and place on ungreased baking sheet. Bake about 10 minutes. Makes 12 to 15 biscuits

Forced Molting Cited

While reports generally have indicated prospects for a better egg market in the latter half of 1971, the Northeast Egg Marketing Association has issued the following comment in its newsletter:

"Fowl slaughter in the south and west has been off substantially since Easter and at times well below that of a year ago.

"As a result birds are being forced molted in record numbers and will soon start to reenter the laying flock. If the practice is continued, it will keep egg prices depressed indefinitely and eliminate any chance for a profitable egg price this summer.

"It is reported that many southern producers are in the position of not being able to get financing for new pullets and that their only alternative to force molting may be going out of business immediately."

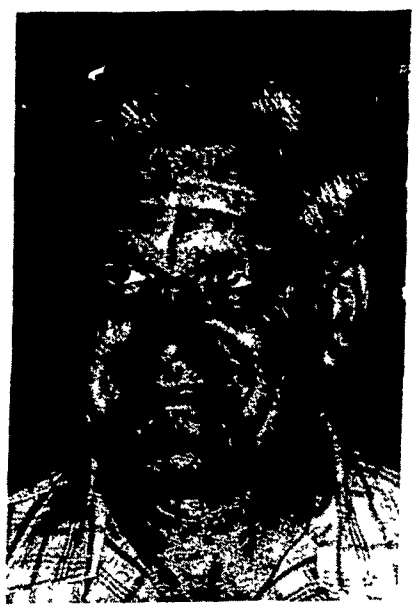
AGWAY

WHO CARES? WE DO!



Dick Myer

WHAT MAKES CONTINUED GROWTH POSSIBLE

Don Rutt

YOU DO!

ANOTHER AGWAY FIRST...

AGWAY SWINE FEEDS WITH OLEANDOMYCIN

ABSOLUTELY NO WITHDRAWAL PERIOD.

FEED AGWAY RATIONS OR YOUR MIX UNTIL MARKET

THINK: Should We Together (Cooperatively) Continue to Develop Programs

1. TO KEEP YOUNG FARMERS ON THE FARM.
2. TO KEEP MORE FARM FAMILIES ON LESS ACRES.
3. TO MAKE MORE $ PER ACRE FOR YOU.
4. TO ELIMINATE YOUR NEED FOR MORE EXPENSIVE ACRES.
